1274-407	Protective rubber boot - set of 3					

Technical Description

Essentially for trimming hedges, topiary, bushes and trees, this ladder is perfect for use when working on lawns or uneven ground. The 3rd leg is telescopic and depending on the task, you can face-on with the 3rd leg planted into a hedge, or sideways with one side of the base parallel to the hedge giving the perfect work position. This ladder easily straddles other shrubs as well as low fences and walls.

They are stable due to the 3 legs and the wide base and comfortable to stand and work from, thanks to their double rung treads. They are ideal for orchard work, both for pruning and picking. Their single 3rd leg gives easy access into the tree's crown. Unlike old style pointed orchard ladders, this ladder has a flat top that is perfect for resting baskets or work tools.

- » Manufactured from welded aluminium alloy extrusions
- » Lightweight yet strong ladder to work from
- » Will not wobble on uneven ground

Standards & Classification

- » Maximum Static Vertical Load 100kg

Warranty

- » 1 Year
