1274-407	Protective rubber boot - set of 3						

Technical Description

Our platform Tripod ladder has much deeper 175mm top working step than standard Tripod ladders. This, along with a handrail to lean into or hold onto, makes it perfect for more cautious gardeners who have more or less fixed height work. It retains all the features of the standard Tripod ladder, making it stable on uneven ground, providing easy access to many work situations both inside and outside the home.

- » 175mm deep top platform step
- » Manufactured from welded aluminium alloy extrusions
- » Lightweight yet strong ladder to work from
- » Will not wobble on uneven ground

Standards & Classification

- » Maximum Static Vertical Load 100kg

Warranty

- » 1 Year
