Technical Description

Strong oval box-section stiles offer the combination of lightweight usability and strength needed for roof work. The ladder is supplied with a roof hook to secure on the central ridge with wheels to run the ladder up the roof. The roof hook will need to be assembled and attached to the ladder when it has been delivered. Protected bearers fitted at intervals help spread the load across the roof tiles.

- » Strong oval box section stiles
- » Serrated round rungs at 300mm centres
- » Ridge hooks constructed from 25mm square tube 100mm diameter running wheels
- » Bearer bars fitted with protective PVC sheathing
