1400-116	GoodToGo Safety Ladder Check Book
1400-117	GoodToGo Safety Ladder Weekly Kit
1400-118	GoodToGo Safety Ladder Daily Kit

## Description (1400-116 Ladder Check Book)

The Good to Go Safety Check Book is an innovative tool for workplace equipment. It allows workers to carry out pre-use checks and spot potential faults before they develop into a more serious and costly defect. These safety checklists are designed to help improve safety, reduce maintenance costs and ensure compliance with legal responsibilities.

**“Work at Height Regulations (WAHR) stipulate that regular inspections are conducted by a competent person for all work at height equipment (including ladders); the records of formal detailed inspections are legally required to be made available to a health and safety inspector.”**

Users should carry out a pre-use visual & functional check prior to setting up a ladder to identify any obvious defects that could prevent its safe use.

Each check book contains 25 individual checklists relating to components and structural checks to be completed before the ladder is used. Duplicate carbon copies of the completed checklists are retained in the book for management records. The book also includes useful guidance notes to remind operatives what to look for during their inspection.

## Description (1400-117 Ladder Weekly Kit)

---

Good to Go Safety is a Safe Equipment Management System (SEMS) which allows workers to carry out pre-use inspection checks of ladders enabling you to spot potential faults before they develop into a more serious and costly defect. Attaching a tag to your ladders provides a clear visual reminder to carry out a pre-use inspection checklist and allows a completed inspection checklist to be placed inside the status tag to show the findings and date of inspection checklist. The Good to Go Safety Ladder Weekly Inspection Checklist Kit provides everything required for a full year of weekly inspection checks and is designed to help improve safety, reduce maintenance costs and ensure compliance with legal responsibilities.

**“Work at Height Regulations (WAHR) stipulate that regular inspections are conducted by a competent person for all work at height equipment (including ladders); the records of formal detailed inspections are legally required to be made available to a health and safety inspector.”**

Users should carry out a pre-use visual & functional inspection prior to setting up a ladder to identify any obvious defects that could prevent its safe use.

Each kit contains 50 individual (weekly) inspection checklists relating to ladder components and structural checks to be completed before the ladder is used. Duplicate carbon copies of the completed inspection checklists are retained in the book for management records. The book also includes useful guidance notes to remind operatives what to look for during their inspection.

### Each Weekly Inspection Kit includes:

- 1 x Status Tags to attach to the equipment and show its status.
- 2 x Safety Check Books provide 50 individual checklists, allowing one to be completed each week and the findings displayed inside the status tag. Additional books can be ordered as and when required.
- 1x Check Book Wallet & Pen, to store the current book and provide a suitable writing surface when completing checklists.
- 100 x Tamper Evident Seals, which can be used to deter and identify unauthorised access to the status tag.

## Description (1400-118 Ladder Daily Kit)

---

Good to Go Safety is a Safe Equipment Management System (SEMS) which allows workers to carry out a pre-use inspection of a ladder and spot faults before they become a more serious and costly defect. Simply attach a tag to equipment to provide a clear reminder to carry out a pre-use inspection checklist. Then simply place the checklist inside the tag to show the findings and date of inspection. The Daily Inspection Checklist Kit provides everything required for a full year of daily inspection checks and is designed to help improve safety, reduce maintenance costs and ensure compliance with legal responsibilities.

**“Work at Height Regulations (WAHR) stipulate that regular inspections are conducted by a competent person for all work at height equipment (including ladders); the records of formal detailed inspections are legally required to be made available to a health and safety inspector.”**

Users should carry out a pre-use visual & functional check prior to setting up a ladder to identify any obvious defects that could prevent its safe use.

Each kit contains 275 individual checklists relating to ladder components and structural checks to be completed before the ladder is used. Duplicate carbon copies of the completed checklists are retained in the book for management records. The book also includes useful guidance notes to remind operatives what to look for during their inspection.

### Each Daily Inspection Kit includes:

- 2 x Status Tags to attach to the equipment and show its status (includes a spare).
- 11 x Safety Check Books provide 275 individual checklists, allowing one to be completed each day of the year (based on a 5-day working week) and the findings displayed inside the status tag. Additional books can be ordered as and when required.
- 1x Check Book Wallet & Pen, to store the current book in use and provide a solid writing surface when completing checklists.
- 300 x Tamper Evident Seals, which can be used to deter and identify unauthorised access to the status tag.
