PASMA Work At Height Essentials Course

Course Syllabus

Who should attend this course:
Anyone who is involved in work at height.

Learning Objectives

To enable an individual to effectively comply with their duties under the Work at Height Regulations.

Method

Instruction by theory session with exercises.

Assessment

Closed book course with a pass mark of 80% in both theory and practicals.

PPE

None required.

Course Content

Current Legislation, Regulations and Guidance affecting work at height.

Venue Requirements

Training can be undertaken at our offices or at your site. However a suitable classroom to accommodate 12 delegates for the theory and assessment sessions will be required.

Supporting Documents

A course content and notes booklet and a current Code of Practice booklet will be issued to all delegates who attend the course.

Award

A PASMA Certificate and PhotoCard will be issued to successful delegates who complete the Theory and Assessment, which has a five year validity period.

Qualifications & Experience

No qualifications or experience are required for this course.

Literacy, Fitness & Health

Since the safe use of mobile access towers requires that delegates consult safety notices and read and thoroughly understand the manufacturer's instruction manual, literacy and language comprehension are important requirements for any tower user. Similarly, since the assembly and use of mobile access towers can be physically demanding, users should be physically fit and in good health and should, generally, not have problems with eyesight or hearing, heart disease, high blood pressure, epilepsy, fear of heights / vertigo, giddiness / difficulty with balance, impaired limb function, alcohol or drug dependence or psychiatric illness. If delegates have any problems with literacy or language comprehension, or have any doubts about their fitness to use mobile access towers, they must bring them to the attention of their employer. This need not preclude them from using mobile access towers, provided their employer conducts an assessment and is able to put into place adequate measures, to take account of any difficulties they may have.

About PASMA.

Founded in 1974, the Prefabricated Access Suppliers' and Manufacturers' Association (PASMA), is the recognised focus and authority for mobile access towers. As such it advances safety, standards and best practice across a wide range of sectors and represents the interests of manufacturers.
