TLA Ladder & Stepladder Inspection Training

Course Syllabus

Those whose duty is to inspect and maintain ladders & stepladders in their workplace.

Learning Objectives

Delegates will be competent to:

- Assess and determine when it's appropriate to inspect a ladder or stepladder
- Record finding & recommend action to be taken if faults are found
- Accurately record details of ladders & stepladders

They will have an understanding of:

- What they need to know about the law and standards relating to ladders & stepladders
- Storage & handling of ladders & stepladders

Method

The course is planned to run over a minimum of 4 hours.

Training Activity

- Slide led – trainer providing information and asking questions
- A group exercise on inspections & hazard analysis
- An individual questionnaire on inspection of Ladders & Stepladders

Assessment Process

There are assessment activities:

- Multiple Choice Questions
- Ladder & Stepladders fault finding
- Carrying, positioning of ladders and stepladders

Assessment

Closed book assessment with an 80% pass mark.

PPE

Suitable head / foot protection and gloves during the practical session (other protection as per site requirements).

Course Content

Current Legislation, Code of Practice, Regulations and Guidance affecting work at height.

Venue Requirements

Training can be undertaken at our offices or at a customer's site. However a suitable classroom and practical area to accommodate 8 delegates for the theory and assessment sessions will be required.

Supporting Documents

Ladder Association summary notes for each delegate.

Award

A Ladder Association certificate and LadderCard will be issued to successful delegates who complete the theory and practical assessment, which has a five year validity period.

Qualifications & Experience

Delegates must have successfully completed the TLA Ladder & Step Ladder User Training Course prior to attending this course.

Literacy, Fitness & Health

Delegates must be numerate, literate and have a good command of English. They should be fit and capable of lifting, carrying and using ladders and stepladders.

In Association with The Ladder Association.

The Ladder Association works closely with the Health and Safety Executive (HSE), Department of Business, Enterprise and Regulatory Reform (BERR) and the British Standards Institute (BSI), to ensure that the voice of both the consumer and the industry is heard during the formulation and revision of legislation relating to access equipment throughout Europe. The Ladder Association is also a founder member of the Access Industry Forum.

The Ladder Association Code of Practice for leaning ladders and stepladders is intended to give specifiers and users advice on the safe and effective use of portable ladders and steps. The Code of Practice also covers the implementation of the European Temporary Work at Height Directive.
