Vinyl Flooring**	✗	✓	✗	✓
Ceramic Tiles**	✗	✓	✗	✓
Marble Tiles**	✗	✓	✗	✓
Glass Tiles**	✗	✓	✗	✓

\*Top surface contamination refers to areas where there could be clay, diesel or any residue getting into the TOP SIDE of the Ladder M8rix that could compromise the standard rubber grip on the base of the ladder. In these circumstances, the Ladder M8rix Industrial is the best option.

\*\*Interior surfaces must be dry.

## IMPORTANT INFORMATION

The LadderM8rix range only helps to reduce ladder slippage. We always recommend ladder safety straps/ties should be used in conjunction with this product. Caution sharp edges. User uses this product at their own risk.

- Regular inspection of the LadderM8rix is to be carried out by a competent/trained person.
- The LadderM8rix must be set up on an even, horizontal and stable surface.
- For a leaning ladder, you should always secure it (e.g. by tying the ladder to prevent it from slipping either outwards or sideways) and have a strong upper resting point.
- Care and appropriate safety clothing and gloves must be used at all times to avoid injury from the sharp edges.
- Keep away from children and animals
- Store in protective case when not in use.
- Please retain this leaflet.

# LADDER M8rix

## The ultimate ladder safety device

# LADDER M8rix

## IMPORTANT INFORMATION

Before using the LadderM8rix product ensure:

Individual / organisation risk assessments have been carried out and which identified that:

- A ladder / ladder safety device is the most appropriate solution for the situation.
- A ladderM8rix is the most suitable ladder safety device for the requirements.
- The chosen LadderM8rix meets the surface needs.
- The ladder operative is competent and trained, and is following the 'HSE Safe Use of Ladders and Stepladders Guide' and the 'Working at Height Act'.
- The ladder operative is wearing appropriate ladder safety workwear – the LadderM8rix Industrial, Professional & Pro-Plus all have sharp edges. Therefore, work safe footwear, clothing and safety gloves should be worn at all times.
- Inspection of the LadderM8rix has been carried out by a competent / trained person
- The ladder is secured at the top and middle (where appropriate) (see diagram) and other safety tools/precautions are implemented as per risk assessment outcome.

# HOW TO USE YOUR DEVICE

LADDER M8<sub>rix</sub> Professional  
LADDER M8<sub>rix</sub> Industrial  
LADDER M8<sub>rix</sub> Interior

- Set up the ladder as per the 'HSE Safe use of Ladders and Stepladders' guide & the 'Working at Height Act'.
- Place the LadderM8rix onto the surface, ensuring that the product has gripped the surface.
- Place the feet of the ladder against the wall of the product.
- Make sure you have placed the LadderM8rix at a position which allows the ladder to be placed at an angle of 1 in 4.

## LADDER M8<sub>rix</sub> Pro-Plus Indoor use

Set up the ladder as per the 'HSE Safe Use of Ladders and Stepladders Guide' and the 'Working at height act'.

Open the carry case, leaving the LadderM8rix Pro-Plus inside its case. Place the case rubber side down, ensuring that the product has gripped to the indoor surface.

Place the feet of the ladder against the wall of the product.

Make sure you have placed the LadderM8rix at a position which allows the ladder to be placed at an angle of 1 in 4.

## LADDER M8<sub>rix</sub> Pro-Plus Outdoor use

Set up the ladder as per the 'HSE Safe Use of Ladders and Stepladders Guide' and the 'Working at height act'.

Open the carry case and remove the LadderM8rix.

Place the LadderM8rix onto the surface, ensuring that the product has gripped the surface.

Place the feet of the ladder against the wall of the product.

Make sure you have placed the LadderM8rix at a position which allows the ladder to be placed at an angle of 1 in 4.

## LADDER M8<sub>rix</sub> with a stabiliser

- Using the LadderM8rix with a ladder stabiliser by placing the LadderM8rix at an angle (with the stabiliser bar feet touching the LadderM8rix shoulder).
- Set up the ladder as per the 'HSE Safe Use of Ladders and Stepladders Guide' and the 'Working at Height Act'.
- Place the LadderM8rix(s) at an angle with the stabiliser bar feet touching the LadderM8rix shoulder/wall of the product, ensuring the LadderM8rix product has gripped the surface.
- Make sure you have placed the LadderM8rix at a position which allows the ladder to be placed at an angle of 1 in 4.
- LadderM8rix range can be used on almost any length of ladder stabiliser bar.
